EDUCATION

GLA University, Mathura

Aug 2023 – May 2027

B.Tech Computer Science • CGPA: 8.01 / 10

EXPERIENCE

Full Stack Web Developer (Freelance) | First Bridge School of Business | [Link](#)

Nov 2025 – May 2026

- Developed 6+ scalable, responsive web applications using Next.js and TypeScript, improving page load time by ~30% through server-side rendering (SSR) and code splitting.
- Implemented Supabase Authentication with role-based access control (RBAC) for three user roles and designed PostgreSQL schemas to support secure and scalable admin dashboard operations.
- Built an admin dashboard that reduced manual administrative effort by ~40%.

Frontend Developer (Freelance) | Cosmoversity (UK-based) | [Link](#)

Aug 2025 – Nov 2025

- Developed 10+ responsive Next.js pages and 20+ reusable components, reducing code duplication by ~35%.
- Improved Lighthouse score from 68 to 91 through lazy loading, image optimization, and bundle optimization.
- Refactored frontend architecture to improve maintainability and accelerate feature development.

PROJECTS

CareerCraft AI | AI-Powered Resume Analysis Platform | [Link](#)

- **Tech Stack:** Next.js • TypeScript • OpenAI API • Tailwind CSS • Clerk • Supabase
- Built an AI-powered resume analysis platform using the OpenAI API that evaluates resumes against job descriptions, generates ATS-focused feedback, identifies missing keywords, and provides personalized improvement suggestions.
- Implemented secure authentication, PDF resume upload, prompt engineering, structured AI responses, and an interactive dashboard to deliver actionable resume insights and improve job application readiness.

ReGadget | Device Repair & Service Platform | [Link](#)

- **Tech Stack:** MERN • Firebase • Gemini AI Chatbot
- Built a full-stack device repair platform featuring Firebase Authentication, scalable REST APIs, and real-time service request tracking for streamlined repair workflows.
- Integrated the Gemini API to develop an AI-powered assistant capable of answering repair-related queries through prompt-based interactions, enhancing customer support and user engagement.

GreenCart | E-commerce Grocery Platform | [Link](#)

- **Tech Stack:** MERN • Stripe API • Tailwind CSS
- Built a scalable MERN e-commerce platform with secure JWT authentication, modular REST APIs, Stripe payment integration, and responsive user experience.
- Optimized Redux state management to reduce unnecessary re-renders by 25% and designed reusable backend services for product catalog, order processing, and user management.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

AI & LLM: OpenAI API, Gemini API, Prompt Engineering, Generative AI, LLM Applications, AI-assisted Development

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS

Databases: PostgreSQL (Supabase), MongoDB, MySQL

Developers Tools: Git, GitHub, REST APIs, Postman, Docker, GitHub Actions, Jenkins, Firebase, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

Coding Practice: 350+ problems solved (300+ DSA | 50+ SQL)

Google Arcade: Champion — Legend Tier, awarded official Google swags for completing all challenge tracks

Hackathon: Deviathon – Round 2 Qualifier out of 500+ participants
