EDUCATION

GLA University, Mathura

Aug 2023 – May 2027

B.Tech Computer Science • CGPA: 8.01 / 10

EXPERIENCE

Full Stack Web Developer (Freelance) | First Bridge School of Business | [Link](#)

Nov 2025 – Present

- Built 6+ dynamic, responsive web pages (programs, admissions, faculty, campus) using Next.js, reducing page load time by ~30% via SSR and code splitting.
- Implemented Supabase Auth with role-based access control for 3 user types and managed PostgreSQL schemas for the admin dashboard.
- Built a fully functional admin panel for content and user management, cutting manual admin tasks by ~40%.

Frontend Developer (Freelance) | Cosmoversity (UK-based) | [Link](#)

Aug 2025 – Nov 2025

- Developed 10+ responsive Next.js pages and a reusable component library of 20+ components, reducing redundant code by ~35%.
- Improved Lighthouse score from 68 → 91 via lazy loading, image optimization, and bundle splitting.
- Gained hands-on DevOps exposure: Docker containerization, AWS EC2 deployment, and GitHub Actions CI/CD.

PROJECTS

GreenCart | E-commerce Grocery Platform | [Link](#)

- **Tech Stack:** MERN • Stripe API • Tailwind CSS
- Built a full-stack grocery e-commerce app with cart management, order tracking, and Stripe payment integration — handling 100+ test transactions.
- Designed RESTful APIs for product catalog, order processing, and JWT auth; improved UX with Redux state management, cutting re-renders by ~25%.

ReGadget | Device Repair & Service Platform

- **Tech Stack:** MERN • Firebase • Gemini AI Chatbot
- Built a device repair booking platform with Firebase Auth, dynamic service listings, and a Gemini AI chatbot — reducing support queries by ~50%.
- Designed a scalable backend for service requests and admin workflows with real-time status tracking (in development).

Wanderlust | Travel Listing & Booking Platform | [Link](#)

- **Tech Stack:** MERN (MongoDB • Express • React • Node.js)
- Developed a full-stack travel listing platform where users explore, post, and review destinations — with Cloudinary image uploads and Mapbox map integration.
- Built full CRUD REST APIs for listings, reviews, and bookings with JWT-based auth and session management across all modules.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, EJS

Databases: MongoDB, MySQL, Supabase (PostgreSQL)

Cloud & DevOps: AWS EC2, Docker, GitHub Actions (CI/CD), Jenkins

Tools: Git, REST APIs, Postman, Cloudinary, Firebase

Coursework: Data Structures & Algorithms, DBMS, OOP, Computer Networks, Operating Systems

ACHIEVEMENTS

Coding Practice: 300+ problems solved (250+ DSA | 50+ SQL)

Google Arcade: Champion — Legend Tier, awarded official Google swags for completing all challenge tracks

Hackathon: Deviathon – Round 2 Qualifier out of 500+ participants
